Healthcare Facility Intelligence on Databricks Free Edition

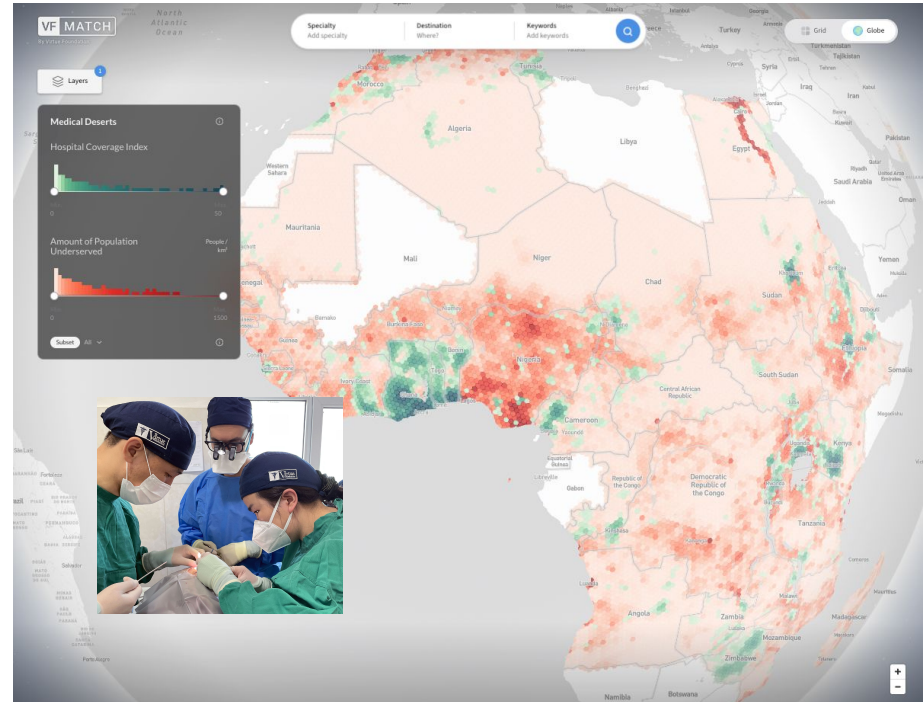

Turning 10,000 messy Indian healthcare facility records
into decisions planners can trust.

Facility Coverage by Country

Significant Unmet Need, Especially in LMICs

- ▶ **1.1 billion** people live in multidimensional poverty
- ▶ **2.88 billion** global DALYs — years of healthy life lost
- ▶ **143 million** people awaiting surgery in LMICs each year

Volunteer

for healthcare opportunities
and explore medical deserts

Ask AI

About VF Match

VF Match is a technology platform built by the Virtue Foundation that connects healthcare needs with the right resources worldwide.

Using AI, predictive analytics, and real-world data, it helps governments, nonprofits, companies, and individuals deliver care more efficiently to underserved populations.

Welcome to the stage

Michael Berk

The Challenge

You're given **10,000 messy records** of healthcare facilities across India: structured fields plus uneven free-text on claimed capabilities, equipment and services.

Build a Databricks App that helps a non-technical planner extract structure, show evidence, communicate uncertainty honestly, and persist their work.

10,000

records

51

columns

India

focus

PICK ONE TRACK

1

Facility Trust Desk

Can a facility actually do what it claims?

2

Medical Desert Planner

Where are the real, highest-risk gaps in care?

3

Referral Copilot

Where should a patient or coordinator go?

4

Data Readiness Desk

What must be fixed before planning can trust it?

India: denser than any large nation on Earth

1.4B

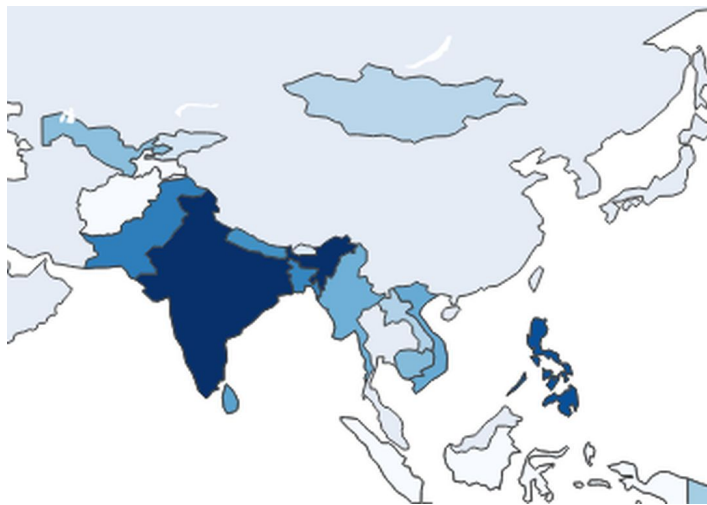

people

~484

people / km²

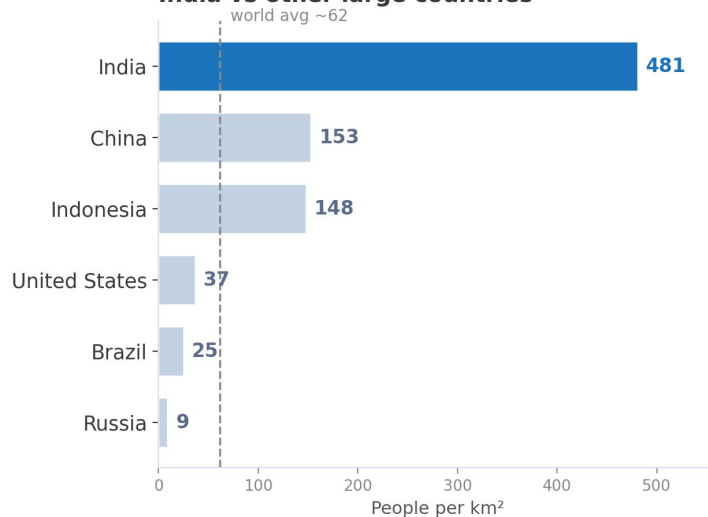

~8x

the world average

47,169 facilities overall — more than any other country in FDR

India vs other large countries

Source: World Bank, population density (~2022)

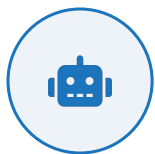

Where the dataset comes from

The hackathon data is the output of the Foundational Data Refresh (FDR): a pipeline that turns the open web into structured healthcare infrastructure data.

Core Requirements

Your Project Must:

- Run as a Databricks App on Free Edition.
- Use the provided facility dataset.
- Support a clear non-technical user workflow.
- Cite the underlying facility text for any important claim, recommendation, score, or ranking.
- Communicate uncertainty instead of presenting weak evidence as fact.
- Persist user actions such as notes, overrides, shortlists, scenarios, or review decisions.

Hackathon Prizes

1st Place

\$10,000

Agenda: Monday

June 15th, 2026

Activity	Time
Opening Ceremony & Hacking Starts	8:30 AM
Team Building Event	8:45 AM
Lunch	12:00 PM
Venue closes for the day	4:00 PM

Agenda - Tuesday

June 16th, 2026

Activity	Time
Venue Opens & Mentors Available	11:00 AM
Devpost submission due!	3:00 PM
Hacking Ends	5:00 PM
Judging	6:00 - 8:00 PM
Closing Ceremony & winners announced!	8:15 PM

Databricks Apps & Agents for Good Hackathon

Let's talk Judging

Judging Schedule

June 16th, 2026

Activity	Time
Submit project through Devpost	3:00 PM
Final Hacking Deadline	5:00 PM
Practice demo / Break	5:00 - 6:00 PM
Expo / Judging	6:00 - 7:30 PM
Closing Ceremony, winners announced	8:00 PM

Judging Schedule

June 16th, 2026

Activity	Time
Submit project through Devpost	3:00 PM
Final Hacking Deadline	5:00 PM
Practice demo / Break	5:00 - 6:00 PM
Expo / Judging	7:00 - 7:30 PM
Closing Ceremony, winners announced	8:00 PM

Judging Schedule

June 16th, 2026

Activity	Time
Submit project through Devpost	3:00 PM
Final Hacking Deadline	5:00 PM
Practice demo / Break	5:00 - 6:00 PM
Expo / Judging	6:00 - 7:30 PM
Closing Ceremony, winners announced	8:00 PM

Judging will be
science-fair style.

Judges will come to
you!

You have **3 minutes**
to demo your
project

Judging Criteria

1. Product judgment
2. Evidence and uncertainty
3. Technical execution
4. Ambition

Demoing Tips & Tricks

- Jump into your demo right away!
- Talk about the track you choose and why
 - How does your project provide relevant and insightful information to the end user?
- **Have fun!**
